PROFILE

Final year Software Engineering student at PUCIT (3.6 CGPA) with hands-on experience building ASP.NET Core, React.js and Mern stack applications across Clean Architecture, MVC, and Microservices patterns. Comfortable from REST API design and backend architecture to polished frontends, seeking a software engineering internship or junior developer role.

EDUCATION

University of the Punjab (PUCIT)

Bachelors in Software Engineering

CGPA: 3.6 / 4.0 • Relevant Coursework: OOP, DSA, Database Systems, Artificial Intelligence

Lahore, Pakistan

Sep 2023 – Present

SKILLS

Languages: C#, JavaScript, TypeScript, SQL, C++, Python

Backend: ASP.NET Core, Node.js, Express.js, REST APIs, JWT Auth, Google OAuth

Frontend: React.js, Next.js, Angular

Databases: SQL Server, PostgreSQL, Oracle, Supabase, MongoDB

Tools: Git, GitHub, Postman, Jira, Vercel, Docker

PROJECTS

E-Commerce — .Net/Next.js (Personal Project)

[GitHub](#)

- Layered Clean Architecture API with product, category, cart, and order modules — JWT auth, Bcrypt password hashing, and role-based authorization.
- Repository pattern, dependency injection, and SOLID principles applied end-to-end across all service, application, and infrastructure layers.

CS Resource Hub — MERN (Personal Project)

[Github](#) | [Live](#)

- Community platform for students to upload and discover study resources — notes, past papers, and lecture videos — tagged by course and instructor, with an admin moderation queue gating all uploads before they go public.
- Node.js + Express + MongoDB backend with JWT and Google OAuth authentication and Cloudinary-based file storage, paired with a React (Vite) + Tailwind CSS frontend.

Book Notes & Tracking Application Supabase/Next.js (Personal Project)

[GitHub](#) | [Live](#)

- Full-stack production app with REST API routes, ISBN auto-fetch, reading status tracking, and per-book multi-note support.
- Node.js + Supabase backend with PostgreSQL row-level security and Google OAuth sign-in.
- Deployed on Vercel and Supabase; live with 10+ active users.

Installment Management System (Freelance Project)

- Full-stack billing system for managing customer records, order creation, and installment-based payment plans, with complete payment history tracking — built with Next.js and Supabase.

apiga.pk — Event Website React (Freelance Project)

[Live](#)

- Fully developed and deployed a frontend-only React application as the official event website for APIGA Pakistan 2025, a youth Internet-governance program co-hosted by ICANN.

Campus Involvement

- Media Head, Sports Society — PUCIT: Recorded and edited reels and event highlight videos covering university sports events and tournaments.
- Teaching Assistant, Database Systems — PUCIT: Conducted weekly lab sessions for 60–100 students; graded assessments and delivered feedback on SQL, normalization, and query optimization.
- Teaching Assistant, Artificial Intelligence — PUCIT: Supported student learning in search algorithms, knowledge representation, and machine learning through guided assignments and labs.
